

Aquatic Invasive Species Trainings

The Cayuga County Department of Planning and Economic Development along with Watershed Assessment Associates LLC and the Finger Lakes Institute will be holding five aquatic invasive species identification training workshops for the public across the Finger Lakes in July. These trainings are **free, open to the public**, watershed associations, watershed officials and agency personnel. Participants will learn how to identify invasive aquatic plants and animals through presentations and hands-on activities. They will also learn what to do if they find a species of concern.
